Blockfell — Quick Access Brief

Version 2.16.0 · how to reach everything

1. Getting in

Computer	Open **avizent.github.io/blockfell** in Chrome, Edge, Firefox or Safari (or open the saved **Blockfell.html** file). Click the game once to capture the mouse; `Esc` gives it back and opens the pause menu.
iPhone / iPad	Open the web address in **Safari** (iOS 15 or later), hold the device sideways, then **Share › Add to Home Screen** for a full-screen icon. A downloaded Blockfell.html will not run on iOS. Works offline after the first visit.
Which version?	Bottom-left of the title screen. If a newer one is online the title screen offers Restart; in a world use **Esc › Save and Update**. Update every device the same day.

2. Keys at a glance

Moving	
`W A S D`	Walk
`Space`	Jump · swim up
`Ctrl`	Sprint (or double-tap W)
`Shift`	Sneak — won't fall off edges
`Space ×2`	Creative: start / stop flying
Screens	
`E`	Inventory (the catalogue in Creative)
`Esc`	Pause menu · closes any screen
`M`	Sound on / off
`F1` / `F3`	Hide display · show position and speed
`V`	Third-person view

Doing things	
Left mouse	Hold to break; hit a creature
Right mouse	Place, open, use: tables, furnaces, chests, doors, beds, buckets, villagers, pets, signs
Hold right	Eat · draw a bow
Middle mouse	Pick the block you point at
`1`–`9`, wheel	Choose a hotbar slot
`Q` / `F`	Drop one (Ctrl+Q the stack) · swap with off-hand
In inventories	
Right-click	Take half · put down one
Shift-click	Move a stack across · craft as many as possible

3. The pause menu (Esc) and where saves live

Advancements	The 96 goals and which you have reached.
Statistics	Time played, blocks mined, distances (including by Minecart), deaths.
Options…	View distance, brightness, sound and music, touch controls, plus **difficulty and game mode** for this world (Creative gives flying and every block).
Replay the Credits	Appears once you have seen the End (see page 2). Plays the story again, then returns you to the game.
Save and Quit	Saves everything. The game also saves every minute. Always use this before closing the tab.

Saving between devices. Worlds live in the browser you play in. **Dropbox sync** (Singleplayer › Dropbox…, link once per device, same Dropbox account) keeps one world up to date on Mac and iPad — it needs the web address, not the downloaded file. **Export World / Import World…** makes a single .blockfell backup file you can keep in Dropbox › MineCraft or send to a friend. If two devices changed the same world, the game asks which copy to keep — it never overwrites silently.

4. On an iPad or phone

Left thumb (anywhere low-left): joystick; push past the rim to sprint. **Right thumb:** drag to look, tap to place or use, tap a creature to hit it, touch and hold to mine, eat or draw a bow. Buttons on the right: **Jump, Sneak, Inventory, Pause**. Tap a hotbar slot to choose it; hold to drop one. In inventories, tap a stack then a slot, or drag; hold to take half.

Reaching the places and things

version 2.16.0 · full detail in the Player's Guide

To reach…	Do this
Crafting, smelting, storage	Right-click a crafting table, furnace or chest. The 2×2 grid in your inventory (E) works anywhere.
Villages and trading	Explore on foot or by boat. Right-click a villager to trade (they take amber). The Mapmaker sells maps to ruins, dungeons and other villages: hold a map to see the compass. Ring the Village Bell to send everyone indoors and make nearby monsters glow.
The Cinderdeep (fiery caverns below)	Lay a ring of 8 Cinderstone on the ground (4 stone and 4 coal round an iron ingot make 4). Light the middle with a torch or lava bucket, then stand in the glow for 3 seconds — a Deepgate. Go back through the same way. Die there and you wake up on the surface. Bring a water bucket.
The Starhollow (floating islands, always night)	On the surface, lay a ring of 8 Glimmerstone (it hangs from Cinderdeep cave roofs) and use a Star Lens on the middle: 2 Rune Shards, 2 Glimmer Dust and a Fire Opal. Stand in the Stargate for 3 seconds. Fall off an island and the stars carry you home with your things.
The Hollowdrake and the End (2.5.1)	In the Starhollow, climb each of the 4 pylons and right-click its Storm Bell: while any bell rings, the Hollowdrake is shielded. Once all four are silent, fight it (arrows work). Beat it and the Roost gives 8 Star Scales, XP and a Hollowdrake Trophy, and becomes a Stargate home. The first time you see the End (story and credits; Skip allowed); watch again from Esc › Replay the Credits. A Star Lens on the gate calls it back for another fight.
Rails and Minecarts (2.4)	Rails: 6 iron and a stick make 16. Boost Rail uses amber; Station Rail uses red dye. Minecart = 5 iron ingots: hold it and right-click a rail, right-click the cart to climb in, hold W to push off (S brakes, Shift gets out). Hit the cart 3 times to pick it up.
Spears, crossbows, Flame Arrows (2.6)	Spear (planks, cobblestone or iron + 2 sticks): reaches 4.5 blocks; sprint-thrust +2. Crossbow: 3 sticks, iron ingot, 2 string; hold right-click about 1.25 s to load, right-click to fire (~10 damage). Flame Arrow: Ember + 4 arrows makes 4; sets creatures alight. A charge bar shows under the cross.
Potions (2.5, 2.9.1)	Brewing Stand, Glass Bottle and a Water Bottle; six potions (Swiftness, Might, Mending, Night Eyes, Deep Breath, Emberward) plus Featherfall. A brew takes 20 s; 1 Coal fuels 10 brews. Add Glimmer Dust to make a splash potion to throw.
Riding (2.7)	Saddle a Horse or Lavastrider (Ember Lure for lava), right-click to mount.
Spore Isle, Sporecaps, Trident (2.8)	Small islands of purple Sporeloam with giant mushrooms in open ocean (new worlds). Spore Compass (4 iron + a Sporecap) points to the nearest one. Shear a Sporecap for 1-3 Sporecaps (regrows in 3 minutes). Spore Stew gives Night Eyes; Spore Lamp is light 15. Trident: 5 iron + stick; hold right-click and let go to throw.
Potatoes, Milk, new creatures (2.9)	Plant potatoes (bake in a furnace). Milk Bucket from a cow. Powderbugs and Gloommoths live in the dark; Gloommoths drop Moth Silk.
Moth Wings, Fireworks, fish (2.10)	Moth Wings (2 Moth Silk + string): a short glider (armour slot). Fireworks: Blast Powder + stick + string; use to launch, sneak for up to 3. Five new fish; a Fish Jar holds one live fish. Spring Pad bounces you with no fall damage (sneak = no bounce). The Hootlet owl: tame with wheat seeds; it perches on your shoulder and warns of monsters.
Treasure Maps, weather, music, Wandering Trader (2.11)	Treasure Map (Mapmaker level 4 for 8 Amber, the Wandering Trader, ruin chests): the corner compass points to a buried chest (4-6 blocks down; new worlds). Rainbows after rain; a Lightning Rod redirects bolts within 16 blocks. Note Block (25 notes), Jukebox, Tune Box (32 steps, 4 instruments), Blank Disc to Music Disc. The Wandering Trader visits by day for about 9 minutes.
Name Tag, third person (2.11.1)	Use a Name Tag on nothing to name yourself; V shows you from outside.
Axolotls, Squid, Guardians (2.13)	Axolotls in ponds (a raw fish tempts one; it mends 4 and bites hostile creatures in water). Squid in open water drop Ink Sac (Black Dye). Guardian (deep sea, hostile): beam charges about 3.5 s within 14 blocks; drops a Tide Shard (brews Deep Breath).
Powder Snow (2.14)	Pits in snowy highlands (new worlds). You sink slowly; hold Jump to climb out. Staying in it freezes you; any leather armour stops that, and Leather Boots let you walk on top (Shift to sink).
Mineshafts, Cobwebs, cart passengers, runes (2.15)	Mines (new worlds): plus-shaped galleries 12-35 down, rails, oak posts, torches, a Monster Cage at the crossing and chests (rails, Minecart, rune finds). Cobweb slows you; cut with a sword for String. A calm creature near a slow Minecart hops in; Shift + right-click the cart lets it out. Runes: Flame Edge, Thorns (chestplate, leggings), Lure (rod).
Pit-heads, Carpets, Banners, textures (2.16)	**Pit-head**: every mine has an oak headframe with a ladder shaft to the surface on flat ground (new worlds). **Carpet**: 2 wool make 3, any of 16 colours, laid on a solid floor. **Banner**: 6 wool + a stick, stands on the ground, cloth faces you. Stone, grass, logs, planks, bricks, wool and more have richer pixel art.
