Blockfell — Quick Access Brief

Version 2.11.0 · how to reach everything

1. Getting in

Computer	Open **avizent.github.io/blockfell** in Chrome, Edge, Firefox or Safari (or open the saved **Blockfell.html** file). Click the game once to capture the mouse; `Esc` gives it back and opens the pause menu.
iPhone / iPad	Open the web address in **Safari** (iOS 15 or later), hold the device sideways, then **Share › Add to Home Screen** for a full-screen icon. A downloaded Blockfell.html will not run on iOS. Works offline after the first visit.
Which version?	Bottom-left of the title screen. If a newer one is online the title screen offers **Restart**; in a world use **Esc › Save and Update**. Update every device the same day.

2. Keys at a glance

Moving	
`W A S D`	Walk
`Space`	Jump · swim up
`Ctrl`	Sprint (or double-tap W)
`Shift`	Sneak — won't fall off edges
`Space ×2`	Creative: start / stop flying
Screens	
`E`	Inventory (the catalogue in Creative)
`Esc`	Pause menu · closes any screen
`M`	Sound on / off
`F1` / `F3`	Hide display · show position and speed

Doing things	
Left mouse	Hold to break; hit a creature
Right mouse	Place, open, use: tables, furnaces, chests, doors, beds, buckets, villagers, pets, signs
Hold right	Eat · draw a bow
Middle mouse	Pick the block you point at
`1`–`9`, **wheel**	Choose a hotbar slot
`Q` / `F`	Drop one (Ctrl+Q the stack) · swap with off-hand
In inventories	
Right-click	Take half · put down one
Shift-click	Move a stack across · craft as many as possible

3. The pause menu (Esc) and where saves live

Advancements	The 59 goals and which you have reached.
Statistics	Time played, blocks mined, distances (including by Minecart), deaths.
Options…	View distance, brightness, sound and music, touch controls, plus **difficulty and game mode** for this world (Creative gives flying and every block).
Replay the Credits	Appears once you have seen the End (see page 2). Plays the story again, then returns you to the game.
Save and Quit	Saves everything. The game also saves every minute. Always use this before closing the tab.

Saving between devices. Worlds live in the browser you play in. **Dropbox sync** (Singleplayer › **Dropbox…**, link once per device, same Dropbox account) keeps one world up to date on Mac and iPad — it needs the web address, not the downloaded file. **Export World / Import World…** makes a single **.blockfell** backup file you can keep in Dropbox › MineCraft or send to a friend. If two devices changed the same world, the game asks which copy to keep — it never overwrites silently.

4. On an iPad or phone

Left thumb (anywhere low-left): joystick; push past the rim to sprint. **Right thumb**: drag to look, tap to place or use, tap a creature to hit it, **touch and hold** to mine, eat or draw a bow. Buttons on the right: **Jump**, **Sneak**, **Inventory**, **Pause**. Tap a hotbar slot to choose it; hold to drop one. In inventories, tap a stack then a slot, or drag; hold to take half.

Reaching the places and things

version 2.11.0 · full detail in the Player's Guide

To reach…	Do this
Crafting, smelting, storage	**Right-click** a crafting table, furnace or chest. The 2×2 grid in your inventory (`E`) works anywhere.
Villages and trading	Explore on foot or by boat. **Right-click** a villager to trade (they take **amber**). The **Mapmaker** sells maps to ruins, dungeons and other villages: hold a map to see the compass. Ring the **Village Bell** to send everyone indoors and make nearby monsters glow.
The Cinderdeep (fiery caverns below)	Lay a ring of **8 Cinderstone** on the ground (4 stone and 4 coal round an iron ingot make 4). Light the middle with a **torch or lava bucket**, then stand in the glow for 3 seconds — a **Deepgate**. Go back through the same way. Die there and you wake up on the surface. Bring a water bucket.
The Starhollow (floating islands, always night)	On the surface, lay a ring of **8 Glimmerstone** (it hangs from Cinderdeep cave roofs) and use a **Star Lens** on the middle: 2 Rune Shards, 2 Glimmer Dust and a Fire Opal (from the Cinderdeep). Stand in the **Stargate** for 3 seconds. Fall off an island and the stars carry you home with your things.
The Hollowdrake and the End (2.5.1)	In the Starhollow, climb each of the **4 pylons** and **right-click its Storm Bell**: while any bell rings, the Hollowdrake is shielded and blows bounce off. Once all four are silent, fight it (arrows work). It circles, throws star bolts and swoops. Beat it and the Roost gives **8 Star Scales**, a heap of XP and a **Hollowdrake Trophy**, and turns into a **Stargate home**. The first time through, you see **the End** (story and credits; hold a key to speed up, or Skip). Watch it again from **Esc › Replay the Credits**. A **Star Lens** on the gate calls it back for another fight, and each win leaves another Trophy: **place it** as a golden star on a plinth.
Rails and Minecarts (2.4)	**Rails**: 6 iron and a stick make 16. **Boost Rail** uses amber; **Station Rail** uses red dye. A **Minecart** is 5 iron ingots: hold it and right-click a rail to put it down, right-click the cart to climb in, hold `W` to push off the way you look (`S` brakes, `Shift` gets out). Station Rails stop and hold you; hit the cart 3 times to pick it up. Only you can ride; creatures don't use rails.
Spears, crossbows and Flame Arrows (2.6)	**Spear** (planks, cobblestone or iron + 2 sticks, slanted): reaches 4.5 blocks, slower; sprint-thrust does +2. **Crossbow**: 3 sticks, iron ingot, 2 string; **hold right-click** about 1.25 s to load (uses an arrow), right-click to fire a bolt for ~10 damage. **Flame Arrow**: Ember + 4 arrows makes 4; sets creatures alight. A **charge bar** shows under the cross for bow and crossbow; the bow turns gold at full draw.
Spore Isle, Sporecaps and the Trident (2.8)	**Spore Isles** are small islands of purple **Sporeloam** with giant hollow mushrooms in open ocean, about one per thousand blocks, in **new worlds only**. The **Spore Compass** (4 iron + a Sporecap): hold it and an arrow shows the way and distance to the nearest isle. Peaceful **Sporecaps** live there: shear one (**Shears**) for 1-3 Sporecaps, the cap regrows in 3 minutes. **Spore Stew** (3 Sporecaps + carrot) gives Night Eyes; **Spore Lamp** (4 Sporecaps + glass) is light 15. **Trident**: 5 iron + stick; a spear in the hand, **hold right-click** and let go to throw it; it wears 1 per hit and can be picked up again.
Treasure Maps, weather, music, Wandering Trader (2.11)	**Treasure Map** (Mapmaker level 4 for 8 Amber, the Wandering Trader, ruin chests): hold it and the corner compass points to a **buried chest** (4-6 blocks down; **new worlds only**). **Lightning Rod** (Amber over 2 iron): on the highest block, it takes a bolt from within 16 blocks, harmlessly. **Weather Glass** (glass, Amber, iron): shows clear/rain/storm and minutes left. Rainbows follow daytime rain. **Note Block** (planks ring + string): right-click changes the note, punch plays it; the block below picks the instrument. **Jukebox** (planks ring + iron): right-click with a Music Disc. **Tune Box** (planks ring + Amber): right-click to write a 32-step tune (melody, bass, drums); hold a **Blank Disc** (4 coal + Amber = 2) and press Record. **Wandering Trader**: orange hood, daytime, about 9 minutes; potatoes, milk and rare finds for Amber.
Wings, Fireworks, Fish Jars, Spring Pads, Hootlet (2.10)	**Moth Wings**: 4 Moth Silk (from Gloommoths) + string; wear in the chest slot, jump while falling to glide; shorter and steeper than Starwings, 160 s of gliding. **Firework**: Blast Powder + stick + string = 3; right-click to launch (sneak = volley of 3); harmless. **Fishing**: 5 new fish by place and time (Sunfin day, Moonfin night, Frostfin snow/taiga, Glowfin Spore Isle, rare Ruby Carp); cook for Grilled Fish. **Fish Jar**: 5 glass = 2; right-click with a raw fish to fill, right-click again to empty; some glow. **Spring Pad**: leather, string, iron, planks = 2; land to bounce (sneak = soft landing), no fall damage. **Hootlet** (owl, forests/birch/taiga): tame with wheat seeds (1 in 3); follows, perches on your shoulder, hoots when a hostile is within 14 blocks, brings feathers; right-click empty-handed = stay/follow.
